

- People wanting to engage with the community
- Members, their carers and families.

**Other outcomes are:**

- 84 volunteers will have increased confidence and self esteem through participation and positive feedback.
- 84 volunteers will gain new skills and work experience increasing their training and employment opportunities.
- 84 volunteers will have an individual development and action plan with access to support and increased social interaction.
- 84 local people will benefit from community involvement rather than medical solutions for maintaining their well-being.
